#### 4. Создаем глобальную переменную pet store.

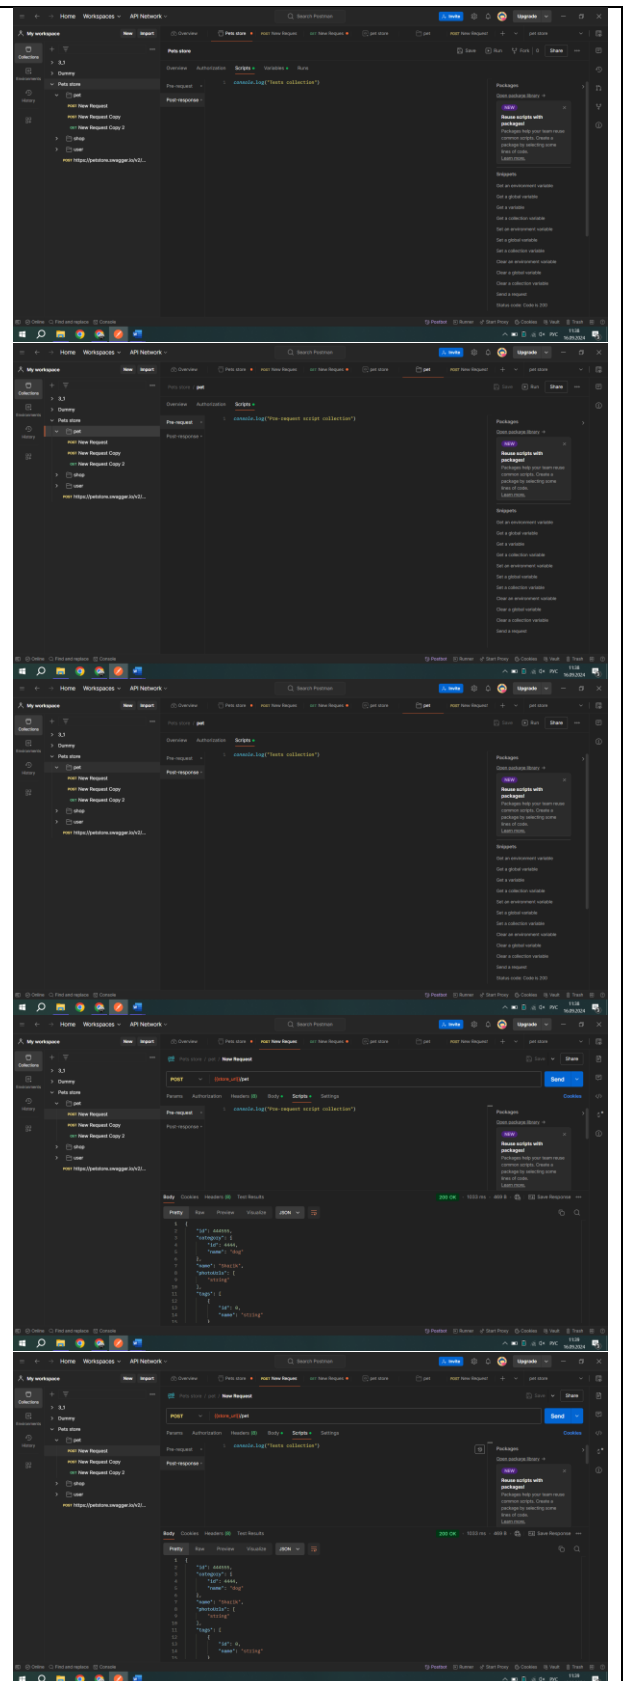

#### 5. Добавляем эту переменную в коллекцию, а также в endpoint.

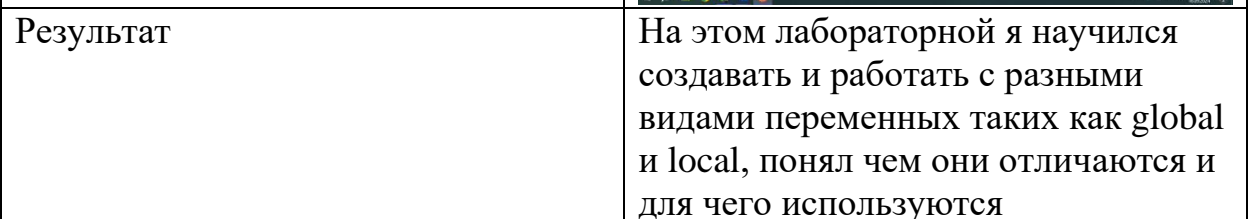

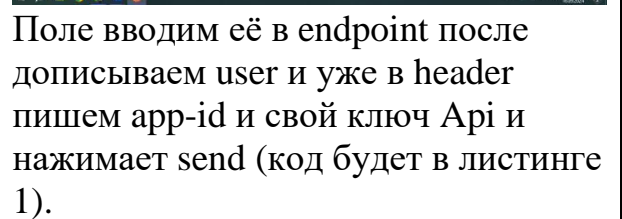

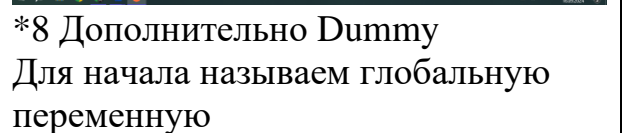

#### 6. Заходим в папку Pet store и добавляем и в ней нажимаем на скрипт и в оба файла вписываем console.log с дополнительным описанием ((«Tests folder»)) и ((«Pre-request script folder»)) тоже самое делаем с папкой pets и 1 запросом.
